

ELEGOO Filament 1 kg, Black

SKU: IT63459

€21.90

Specifications

General Specifications

- Made of high-quality PLA, a commonly used thermoplastic material features lower melting temperature and ease of use
- low warp and shrinkage, odorless during printing, and provides a glossy surface finish.
- Strict tolerances guarantee these PLA filaments of 1.75 mm diameter much smoother
- and more stable printing with the dimensional accuracy of +/- 0.02 mm; 1 kg spool (2.2lbs)
- A larger spool inner diameter design for easy feeding.
- Designed and manufactured with clog-free, superb layer bonding and great fluidity for smooth and stable extrusion.
- Complete dried for 24 hours before packaging and vacuum sealed with desiccants in the bag

- to protect the filament from moisture, no clogging and bubbling problems.
- Universal compatibility with most of the common 1.75mm FDM 3D printers on the market
- due to the high-quality standards in terms of manufacturing accuracy and a small dimensional tolerance of +/- 0.02mm.
