

KARCHER 1.645-851.0 Electric Submersible Pump 750W

SKU: IT62703

€215.00

Specifications

Technical Specifications

- Power: 750W (1.0 hp)
- Type: Dirty Water
- Max flow: 22.000 L/h
- Immersion depth: 7 m
- Delivery head: 8 m
- Pressure: 0.8 bar
- Grain size: 30 mm
- Min. residual water, manual: 35 mm
- Residual water height: 35 mm
- Connection thread: G1/2 internal thread
- Delivery temperature: 35°C

- Comfortable to hold and can also be used as a rope holder
- Switching between manual/automatic operation
- Cable length: 10 m
- Comfortable carrying handle
- Voltage: 230-240V
- Frequency: 50Hz
- Dirt Level Sensor immediately upon contact with water
- Ideal for draining, large garden ponds, flooded basements or construction pits, as it can reliably pump out dirty water
- With even dirtier water, the integrated pull-down stainless steel prefilter serves to protect against blockages

General Specifications

- An individually adjustable level sensor starts the dirty water pump
- If the water level drops below the level sensor again, the pump stops automatically after 15 seconds
- In automatic operation (auto), the pump automatically switches with the water level
- In manual operation, the pump runs continuously until the minimum quantity of residual water is reached
- Ceramic face seal
- [See the manual HERE](#)

Included in the Box

- Hose connection piece: G1, 1", 1 1/4", 1 1/2"
- 1 Quick connector

Weight and Dimensions

- Weight: 6.7 kg
- Dimensions: 23.8 x 29.3 x 35.4 cm
