- Charging time: 1.5 hr

- Rain Sensor
- Noise Levels: 62 dB
- With multi-zone programming, a lawn surface can be divided into several segments
- With the lawn edge mowing function, Robot mows the lawn edge when it returns to the charging station
- Scheduled operating time for each specific day
- Safety sensor system thanks to impact, tilt and lift sensors
- Carrying handle for comfortable transportation

General Specifications

- It overcomes ascents of up to 35%
- Rain sensor: alerts the robot when to return to its charging station
- The mowing times (day or night thanks to the low-noise technology) can also be easily adjusted
- If the battery needs to be charged or the mowing time has expired, the lawnmower will automatically go to the charging station
- The cutting height is infinitely adjustable between 20 mm and 60 mm
- It cuts the grass so finely that it stays on the lawn and serves as fertilizer (Mulching system)
- You just need to lay down the boundary cable and set the desired mowing time
- Anti-theft protection in form of PIN code and warning signal
- Replaceable battery: Can be flexibly used with all Powe X-Change devices
- [See the manual HERE](#)
