SKU: IT48802

€24.90

Specifications

Technical Specifications

- Power Supply: External USB-Power Adapter/remote power supply via antenna cable
- Connection: F Plug
- Frequency Range: 470 - 790 MHz
- Technology: DVB-T

General Specifications

- Active high-resolution UHD-DVB-T/T2 antenna with automatically regulating amplifier for worry-free digital TV reception
- Reception guarantee of HD-Ready, HDTV up to 4K/UHD reference signals
- Special power-saving reception concept for use via USB (e.g. TV/STB or streaming boxes)

- Alternative power supply via coaxial 5V remote supply (e.g. TV or set-top boxes), additional power supplies are unnecessary
- Due to the direct connection, the antenna switches off as soon as the end device is switched off
- Very flat, compact design combined with textile materials and an unusual mixture of materials
- Extra long cable (up to 2.5 metres) for a very wide action radius
- Maximum flexibility for optimum signal processing thanks to variable positioning options for wall, flat or floor mounting
- The optimised calculated receiving area is designed for the best image stability with low noise processing of the received signal
- A T-cable guide integrated on the back side allows the antenna to be positioned on either side of the television
- The latest filter technologies for 3G/LTE/4G & GSM for the best reception performance and most economical use
- Flexible possibilities also allow mobile use, e.g. terrace, camping, caravanning
